Sanket Kumar Singh

sanketkumar08.work@gmail.com | 9663356481 | **Portfolio** | **GitHub** | **LeetCode** | **LinkedIn**

Experience

The Ad Agency, Bhilwara | *Full Stack Developer Intern* **Aug 2026 – Dec 2026**

- Engineered responsive and high-performance e-commerce web applications using **React.js** for dynamic frontend interfaces and **Node.js** with **Express.js** for robust backend architecture.
- Designed and integrated scalable **RESTful APIs** to handle core platform functionality, including product catalog updates, cart management, and streamlined user profile data retrieval.
- Implemented secure user authentication workflows using **JWT** (JSON Web Tokens) and structured backend database operations in **PostgreSQL** using **Prisma ORM** for efficient data modeling.

Education

CMR Institute of Technology **CGPA: 8.42**
B.E. in Information Science and Engineering 2023 – 2027

Air Force School A.S.T.E., Bengaluru **72.2%**
Senior Secondary (Class XII) 2023

Skills

Languages:	Java, Python, JavaScript
Frontend:	React.js, HTML5, CSS3, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, WebSockets, Socket.io, JWT
Databases:	MongoDB, PostgreSQL, SQLite, Redis
Cloud / DevOps:	Vercel, Render, AWS EC2, Azure Devops(CI/CD)
Data / AI:	Python (NumPy, Pandas), Regression Models, PCA, Groq AI
Tools:	Git, GitHub
Fundamentals:	DSA (400+ problems solved), Algorithm Design, SDLC, Testing, Distributed Systems, DBMS, OOP

Projects

DailyPool – Carpooling Platform for Bengaluru Commuters **Website** | **GitHub**
React.js (Vite), Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io, Google Maps API, Groq AI

- Built a full-stack carpooling platform matching commuters by overlapping travel routes using **Groq AI** for route/detour analysis.
- Streamed live driver locations to passengers via **Socket.io** for real-time trip visibility.
- Implemented UPI deep-link payment splitting for one-tap fare settlement via GPay/PhonePe/Paytm.

Rate Limiter Microservice **Website** | **GitHub**
Node.js, Express.js, Redis, Lua, Socket.io, React (Vite), Artillery

- Designed a stateless rate-limiting microservice using **Token Bucket** and **Sliding Window** algorithms as a networked API.
- Eliminated race conditions under concurrent load via atomic **Lua scripts** in Redis for uninterruptible operations.
- Load-tested at **500+ req/sec**, achieving **0% error rate** and **p99 latency of 5ms** across 8,900 requests.

FIFAVal – ML Player Valuation Platform **Website** | **GitHub**
React.js (Vite), Flask, Scikit-learn, Pandas, SQLAlchemy (SQLite), Recharts, GSAP, Gemini API

- Built a full-stack analytics platform on **18,000+** FIFA records to estimate real-time market transfer values.
- Trained a **Gradient Boosting Regressor (99.17% R^2)**; applied PCA reducing 21 attributes to 13 components (95.8% variance retained).
- Built a hybrid RAG "Scout AI" assistant using Pandas + Gemini API with rule-engine fallback for dynamic query parsing.

Additional Information

- Solved 400+ DSA problems on LeetCode and GeeksforGeeks
- Certified in "C Programming" from Udemy, September 2023
- Certified in "The Web Developer Bootcamp" from Udemy, November 2024
- Certified in "Python Programming" from Udemy, June 2024
- Participated in **ByteBattles 1.0**, a DSA Hackathon.
