PROJECTS

- **FIFA Player Transfer Value Predictor**
 - Built a full-stack ML web app using Flask to predict football players' market value from FIFA dataset features
 - Implemented and compared Linear Regression, Random Forest, and Gradient Boosting models for accurate value prediction
 - Applied PCA for dimensionality reduction and classification models to categorize players into Low, Medium, High, Elite tiers
 - Developed an interactive dashboard with custom inputs, famous player presets, and 8 dynamic visualizations for insights
 - **Tech Stack:** Python, Flask, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, HTML, CSS, JavaScript.
- **LinuxWatch – Real-Time Intrusion Detection System**
 - Developed a real-time Intrusion Detection System (IDS) for Linux infrastructure to detect and monitor suspicious activities using rule-based attack detection.
 - Implemented secure authentication with JWT and user-isolated alert/event management using PostgreSQL and Socket.io-based private channels.
 - Designed a custom detection engine with 16 security rules covering brute force attacks, port scans, SQL injection, DDoS, malware, phishing, and MITM attacks.
 - Built a full-stack web application with live alert streaming, analytics dashboard, event monitoring, and

responsive UI for real-time security visualization.

- **Tech Stack:** React.js, Node.js, Express.js, PostgreSQL, Socket.io, JWT, bcrypt, CSS, Docker, GitHub Actions
- **Aegis Vault – Zero-Knowledge Password Manager**
 - Developed a secure password management system with a zero-knowledge architecture ensuring complete user data privacy.
 - Implemented authentication with JWT and encrypted vault storage using a master key-based access mechanism.
 - Designed core features including credential management, password generation, and breach detection for enhanced security.
 - Built a full-stack web application with responsive UI and secure API communication between frontend and backend.
 - **Tech Stack:** React.js, Tailwind CSS, Framer Motion, Flask (Python), PostgreSQL, JWT, bcrypt, Axios, Docker, GitHub Actions

CO-CURRICULAR & EXTRA CURRICULAR ACTIVITIES

- **Online Courses & Certifications:**
 - Certified in “C Programming” from Udemy, September 2023
 - Certified in “The Web Developer Bootcamp” from Udemy, November 2024
 - Certified in “Python Programming” from Udemy, June 2024
- **Hackathons**
 - Participated in ByteBattles 1.0, a DSA Hackathon organized by the Department of Training in collaboration with TrendyTech.
- **Cultural Activities:**
 - Participated in and won numerous theatre events in college fests across Karnataka.
 - Participated as a member of the college cricket team in various inter-college tournaments across Karnataka.
- **Leadership & Additional Responsibilities:**
 - Served as a class representative, acting as a liaison between students and faculty to address academic and administrative matters.
